

VINEETHA BHAT

Software QA / Test Engineer — Manual, Automation & Data Testing

Mangaluru, India | +91 8618270483 | vineethabhat29@gmail.com | linkedin.com/in/vineetha-bhat-a77287251

PROFESSIONAL SUMMARY

Detail-oriented Software QA Engineer with 2+ years of experience in Manual Testing, Automation Testing, and Data Validation across ERP, fintech, and payment systems. Proficient in Selenium WebDriver (Java), BDD/Cucumber (Gherkin), TDD, TestNG, Page Object Model based data validation. Experienced in Linux environments, test lifecycle management (JIRA, Zephyr), and CI/CD integration with Jenkins. Strong background in functional, integration, regression, and end-to-end testing with a keen focus on data accuracy and quality.

KEY SKILLS

Testing Types:	Functional, Integration, Regression, GUI, Usability, Performance, Security, API Testing
Automation:	Selenium WebDriver (Java), BDD/Cucumber (Gherkin), TDD, TestNG, Page Object Model
Data & DB:	MySQL, SQL Server — complex queries, data validation, test data management
API Testing:	Postman, REST API validation (request/response, data integrity)
Tools & Tracking:	JIRA, Confluence, Zephyr, TestRail, Jenkins (CI/CD), Git
Other:	Linux systems, MS Excel (data validation/analysis), Agile/Scrum, SDLC/STLC
Languages:	Java (automation scripts), HTML; Python (basic)

PROFESSIONAL EXPERIENCE

QA Engineer — Invenger Technologies Pvt. Ltd., Mangaluru, India

Feb 2023 – Feb 2025

Digital Claims Payment System

- Executed functional, integration, and regression tests; validated REST API endpoints using Postman to confirm request/response behaviour and data integrity across integrated services.
- Performed MySQL queries to validate data accuracy and consistency post-integration, identifying backend data defects before production.
- Managed test data creation and maintenance across environments to ensure comprehensive and repeatable test coverage.
- Reviewed requirements and technical design documents; documented defects with detailed reproduction steps tracked in JIRA.

Test Automation – Odoo ERP

- Developed and maintained automation test scripts using Selenium WebDriver (Java) with BDD/Cucumber framework, improving test readability and cross-team collaboration.
- Applied TDD practices and integrated automated tests into Jenkins CI/CD pipelines, enabling continuous testing and prompt defect identification.
- Managed parameterised datasets and reusable data repositories for automated runs; tracked via Zephyr.
- Created detailed test plans, test cases, traceability matrices, and comprehensive reports to track testing progress and outcomes.

Odoo ERP Cloud Portal & Modules (Restaurant, Car Parking, Otex)

- Led functional, integration, performance, security, and regression testing for Odoo ERP implementations on cloud portals.
- Designed and documented comprehensive test cases and scenarios in Zephyr; validated end-to-end flows and API endpoints using Postman.
- Conducted usability and GUI testing across web interfaces; reported and tracked bugs for continuous system enhancement.

EDUCATION

B.E. in Computer Science — Canara Engineering College, Mangaluru

2019 – 2023

Grade: 7.9 | Focus: Programming, Automation, and Software Testing

CERTIFICATIONS

AI Fluency Framework & Foundations — Anthropic (Mar 2026) | Selenium WebDriver with Java — Udemy (ongoing) | HTML — QSpiders (with certificate)

ACADEMIC PROJECT

Steganostamp: Smartly Secured e-STAMP

- Developed a digital e-Stamp system using steganographic techniques; embedded encrypted metadata within e-Stamp images to prevent forgery and ensure data integrity — aligning with data validation and security testing principles.

ADDITIONAL

Languages: English (fluent), German (A2) **Strengths:** Team player, Independent, Critical thinking, Detail-oriented, Reliable, Flexible
